20/7/2020	5	Revision following review

Churches and cathedrals are legally permitted to open for purposes of individual private prayer from 13th June. House of Bishops guidance provides for churches to open for funerals from 15th June.

The [government guidance for the safe use of places of worship during the pandemic](#) requires a COVID-19 risk assessment to be carried out for every building and site open to the public. This document provides a template risk assessment, with links to the relevant advice notes. It relates to opening up church and cathedral buildings to clergy and members of the public entering for individual private prayer. As well as offering guidance on best-practice, it is also intended to help parishes make a decision on whether to open for individual private prayer or not, based on their local circumstances, resources and context.

Future versions of this document will be produced when different forms of public worship and access are allowed.

A risk assessment relating to contractors and construction workers forms part of an updated document giving advice on access for these groups. This can be found on the [Church of England Coronavirus pages](#).
